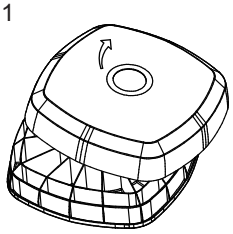
Assembly Instruction
11ft Cantilever Umbrella
Base with Wheels

Please Note: The wheels under the base can move and lock in place. Umbrella should be closed or stored indoors during windy conditions. Do not use during severe weather conditions. Do not leave the umbrella open when not in use.

Components	No	Description	Qty
 (1)  (2)  (3)  (4)  (5) (6) (7)	1	Base substructure	1
	2	Base Cover	1
	3	Nut	1
	4	Fixed Ring	1
	5	Standing Tube	1
	6	Pole	1
	7	Play Sand (not included)	

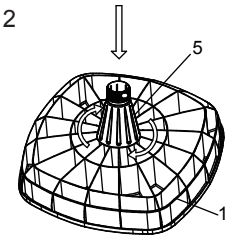
Assembly Instructions

1



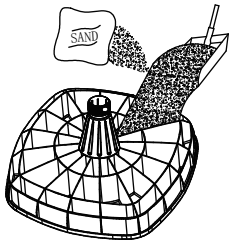
- Select flat, level area to set base/umbrella. Remove Base Cover.

2



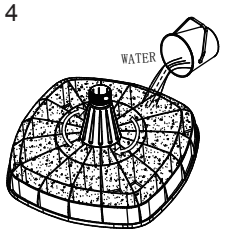
- Insert standing tube.

3



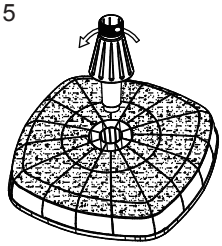
- Fill base with sand.

4



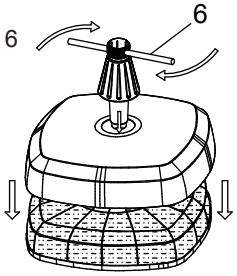
- Add water to saturate the sand.

5



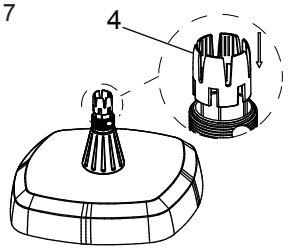
- Remove standing tube.

6



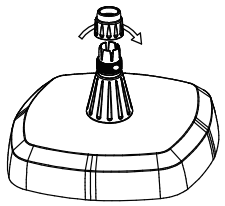
- Reinstall base cover.

7



- Fixed Ring: Make sure the side with thread is facing upwards.

8

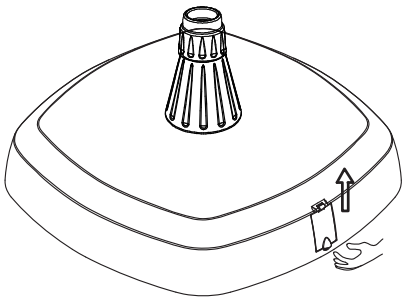


- DO NOT fasten the nut tightly or the lower umbrella pole can't be inserted into the base.

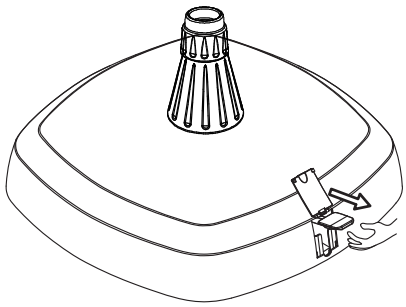
Please note: Make sure to fully fill the inside of the base substructure. If the base is not fully filled, the base cover could be damaged when weight applies to the base cover.

Operating Instruction to Extend or Retract the wheels

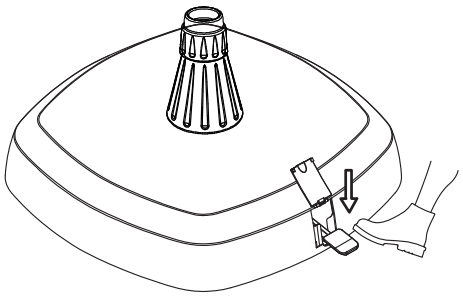
9



10



11



1. Extend Wheels : Pull out the telescoping foot pedal located on the side of the base cover. Apply approximately 90 to 110 lbs of weight to the pedal, in one downward foot stroke to engage the wheels. The umbrella with base is now ready to roll.

2. Retract Wheels : Repeat the above procedure to prevent the base / umbrella from moving, once it is in the desired location.
